# PAPS NEWS TOKEN (PNEWS)

## Safety & Security Guide

### Why Security Matters

As the PAPS News Token ecosystem grows, protecting your crypto assets, identity, and access is critical. This safety guide outlines essential practices to keep your PNEWS safe and your experience smooth.

### 1. Secure Your Wallet

- Use a trusted wallet (e.g., MetaMask, Trust Wallet, Ledger)
- Store private keys and seed phrases offline in a secure location
- Avoid sharing wallet details with anyone
- Use hardware wallets for larger holdings

### 2. Avoid Scams and Phishing

- Double-check URLs (official site: https://paps.news )
- Beware of fake airdrops, DMs, and impostor accounts
- Never connect your wallet to unknown platforms
- If in doubt, ask in the official community channels

### 3. Verify Before You Sign

- Always read smart contract prompts before signing
- Confirm the token address (PNEWS) matches the official one
- Use blockchain explorers to track transactions

### 4. Enable 2FA Where Possible

- Protect your exchange and email accounts with 2FA
- Use an authenticator app, not SMS, for better protection

## 5. Stay Connected to the Community

- Join official Telegram, Discord, or Twitter for real-time updates
- Report suspicious links or scams immediately
- Keep your software, wallets, and antivirus updated

**Together we meme. Together we protect.**
